

A Note to Our Members

Community Electric Cooperative (CEC) has modified its position on meter removal. In years past, CEC allowed electrical contractors to remove meters from service in certain circumstances.

With safety being our greatest concern, we no longer allow the removal of our meters from service by anyone other than CEC employees. If you require your meter to be removed from service, please contact us at (757) 242-6181, and we will be happy to schedule that service for you. This is a free service to you as a CEC member, provided it is scheduled between the hours of 8 AM and 5 PM, Monday through Friday, excluding holidays. These guidelines also apply for reinstalling the meter when your work is complete.

Please note, anyone who removes a CEC meter from service can face a \$500 fine for meter tampering, so play it safe, and let us do the work for you!
